WE LIFT PEOPLE UP!

## 4 POST BARIATRIC LIFT:

*Flexibility and strength. Up to 800 lbs capacity.*

Perfect for rehab, post-op or in-home recovery, the 4 Post Bariatric Lift System offers solid support for patients up to 800 lbs. This lift can be used in any place that requires a sturdier lift for temporary use. It requires no modifications to room structure, and allows easy set up or take down for use in multiple locations.

Standard sizing is 10' x 10' with an X-Y tracking system for maximum flexibility in transferring or repositioning patients over the entire lift coverage area. Smaller sizing can be customized for tighter spaces. Telescoping legs allow height adjustment to match different ceiling heights.

For a flexible lift system that can transfer heavier patients over a wide

area without altering the facility structure, the 4 Post Bariatric Lift System is the ideal solution.

### FEATURES

- Maximum flexibility in a sturdy lift.
- 4 posts provide full room transfer coverage.
- 800 lbs. (364 kg) capacity.
- Portability allows quick takedown and setup.
- Works with C450/C625 Lift.
