HYGIENE SLING

Ideal for toileting or hygiene functions.

Specifically designed for toileting and hygiene functions, the Hygiene sling enables undergarments to be changed while the patient is suspended in the sling. This sling can be paired with other aids for additional support.

This sling requires the patient to have some upper body control, which makes it especially useful for these settings. Do not use if the shoulder joint is compromised.

FEATURES

- Accommodates various seating positions.
- Quilted material enhances comfort.
- Promotes patient upper body control.
- Ideal for changing undergarments.
- Suited for Bed-to-toilet and Bed-to-chair transfers.
